Diagnosis: Chronic Myeloid Leukemia

In 2002, I was **diagnosed with CML (Chronic myeloid leukemia)**. The oncologist was not very optimistic and told me I would either have a **recurrence of the CML** or **develop another cancer** later on.

My **Dentist was Dr. Garnett**, the scientist that invented Poly-MVA. When I discussed my diagnosis with him, he recommended **daily dosing of Poly-MVA**. **I have taken it for 18 years** to fight off the **original diagnosis of CML** and a later diagnosis of **Prostate Cancer**.

In **April of 2018, I was diagnosed with Prostate Cancer**. My daily 1 tsp maintenance dose of **Poly-MVA had kept my CML in check for 16 years** but was not enough to prevent the onset of Prostate Cancer.

When I received the diagnosis, **I immediately started with the maximum loading dose of 8tsp of Poly-MVA daily** as well as the complete approach. I am happy to report that **I am currently cancer free** as of the date of this writing.

I still use Poly-MVA every today as part of my maintenance and good health. Poly-MVA was a very important part of my protocol and **I would not have succeeded without it**.

I am now a twice cancer survivor. Poly-MVA helped me maintain a good quality of life during both cancer treatments. I went thru bone marrow transplant for CML, high dose radiation and intensity modulated radiation therapy (IMRT) for prostate cancer and used multiple vitamins and minerals. **I felt better** and was **less inclined to get colds.**

Amarc Enterprises has a great knowledgeable staff. A great company to do business with and polite friendly caring people. I recommend Poly-MVA to others.

Thank you,

Bob Stegmaier
