I was diagnosed with **stage 4 glioblastoma in Jan 2007**. I recently had an MRI. It showed that **nothing has changed as of 10/29/09**.

I have had good results since I have been taking poly-mva. **I have been on it almost three years**.

I **feel much better** when I take polymva. My **doctor told not to change anything I am doing** because my **MRI showed nothing was growing**.

Thanks for Polymva.

I am **working every day** like I did before cancer. I work at a food store during the day, farm and ranch after that. **My Doctors are calling it a miracle to just be alive**.

Poly-MVA deserves a lot credit. **If it was not for Poly-MVA, I don't think I would be doing this well.** In fact, I just got married.

I talked to Larry's wife, Peggy. **She said Larry is doing well** but working late. They just **celebrated their one year anniversary last Sunday.** She will let him know that I called.

3-01-2018

Spoke to Larry. **He is doing well and continues to take Poly MVA.**
