68 years old in 2020

Poly MVA helped me clear my breast cancer when I first started taking it 4/30/2010. At that time, I was accepted into the QOL Study and **I took 2 bottles per week (14 tsp daily).**

Currently, **I take 1 bottle a month (7 tsp daily) to this day.** I believe Poly MVA greatly contributed to my health and recovery.

It **increased my white cell tremendously even** though **I chose not to do any conventional treatments, i.e. chemotherapy, radiation, other prescription medications.**

I also used the Gerson therapy along with Turmeric, vitamin C IV, B17, melatonin, garlic, selenium.

Other benefits from Poly-MVA were:

- Increase or maintained quality of Life
- Energy

- Increased appetite
- Cancer support
- Improved Fatigue
- Less Pain
- Improved blood, kidney or liver panels

Poly MVA also **helped my mom get rid of her cancer after they had gave her only 3 days to live.** We were giving her 3 bottles a week (20 tsp daily) and in 15 days **she regained conscience** and **began to walk again!!!**

We recommend Poly-MVA to all of our family and friends if they are diagnosed with Cancer. A man that had cancer all over his body and had 6 month to live was given no hope, so **he decided to take Poly-MVA in large amounts and has been alive for 10 years and he is healthy.**

Lupe has been a real advocate for Poly MVA and has referred many people to the AMARC Enterprise office. **She continues to take her daily maintenance dose 10 years since she first started taking Poly MVA.**
