For **20 years Poly MVA** was instrumental in saving and improving my life when **the conventional treatments and doctors failed me.**

I also used Coq10, coral calcium, medicinal mushrooms, Infrared sauna, alkaline water filtration system, organic food.

Benefits I received Poly-MVA include Improved Quality of Life, Energy levels increased, Increased appetite, Less Fatigue, Improved Pain levels along with Improved blood, kidney or liver panels.

My life changed dramatically in 2019 with the passing of my beloved husband of 42 years, Curt. He suffered 6 serious surgeries prior to that which was extremely stressful for me and my family. **Consequently, my cancer has now come back after 21 years of remission.**

One month after my husband's death I slipped on an icy bridge and **ruptured the tumor that was growing in my right breast resulting in a very serious infection that eventually came out to the surface.** This resulted in a mastectomy, and [an increase of PolyMVA to maximum dose.](#)

I refused chemotherapy and radiation since my plate was really full with funeral arrangements and financial concerns. **I have continued PolyMVA for over a year and felt wonderful.**

August of 2020, during the Covid pandemic my legs started going numb resulting from a tumor in my spine. Too dangerous to do surgery so I received 10 doses of radiation treatment which thankfully restored the use of my legs!

I'm very certain that I would not be here today if it weren't for PolyMVA and have referred it to multiple friends and family.
