I have **used poly-MVA for five years.**

When I was diagnosed with breast cancer, Dr. Milne of the Milne Clinic in Las Vegas **recommended that I be on Poly-MVA.**

My **breast cancer had spread to my lymph nodes** and the oncologist strongly urged me to have chemotherapy. I had agreed to radiation **but refused chemo.**

I believe the poly-MVA has not only given me **additional energy**, but **after five years I am in remission.**

I am feeling strong and healthy, in spite of lung damage due to the radiation. **I give much credit to my life style, diet, and Poly-MVA.** Thank you for your continued support.

Spoke to Yvonne. She had stopped poly for a few months because she started getting headaches and the headaches stopped. So, she thinks she had an overload of Vit B. However, she said that **her energy level went down** so she is **now back on poly**.

10-4-2017

Yvonne continues taking a **daily dose of Poly**.
