

Colon Cancer

Poly-MVA Cancer Patient Testimonials

Bonnie Fitzharris

Date: April 2015

Diagnosis: Colon Cancer Stage 2

In April of 2015, **I was diagnosed with Stage 2 Colon Cancer** and decided to go the conventional route with Chemotherapy. After I finished chemo, **I started taking PMVA solely along with the complete approach** and the following support products.

Grapeseed supreme, magnesium buffer chelate, homocysteine, ultra-mega 3, oxysol, glucosamine chondroitin, vit D 3, vitC, multivitavitamin, irbesartan, hydrochlorothiazide 81mg aspirin

I feel that PMVA and the magnesium chelate have been **very beneficial in maintaining my quality of life**. As I stated, I started using it right after chemo and have **maintained using PMVA for 5 years** and **have not had a relapse**.

I would not give up using PMVA because I believe it has been instrumental in keeping my overall health maintained. PMVA is a **good support system** to have and I believe it has helped me stay **healthier, and energetic and stronger**. It is worth the expense as your health is wealth. Amarc customer service has been great. Vivien & Gary have been wonderful in support.
