I had **colon cancer surgery on January 16, 2008**. Tests showed the Cancer had **spread to my liver on March 2008**. From January of 2008 to March of 2008 I had **various side effects from surgery**, but I was not pain.

I went in for a **colonoscopy in June 9th** and was told that **I am now cancer free**. I had avoided chemotherapy, radiation and drugs. I am **amazed that poly-mva cured me so quickly**.

Thank you,

Clifford Chan

Dear Sir,

In March 2008, **my cancer was in my liver**. I decided to take Poly-MVA, and **not chemotherapy or radiation**.

I have been **cancer-free since 2008** and had **avoided the side effects** of chemotherapy or radiation. I am now 85 years old. **Poly-MVA has saved my life**.

I appreciate the discount of Poly-MVA that has allowed me to continue using it.

Yours truly,

Clifford Chan
