Available**

### **2 Updates**

5-14-12 – 3-29-13

The **first time I took Poly-MVA** it was pleasant tasting and **gave me a feeling of energy**. I did **experience a cleansing effect**. This effect came to pass as I was assured. The product was easy to take, **no side effects, no nausea, no rashes**. The more I took Poly-mva **the better I felt**.

I believe **poly-mva along** with the **Protocel** was a wonderful combination. The poly-mva was **easy on my system**. I would take this product on a daily bases. I believe it was **helpful in my recovery from anemia**, and my medical condition brought on by illness.

### **Addendum**

Marc said that he is **doing well & feeling good**. He went back to school. He is **still taking 2 teaspoons 3 times a day**. He has been **on Poly MVA for over a year** and has been doing really well since he started poly. We discussed whether he might decrease his dose of poly. He had surgery and has **only used all natural methods**.

### **5-14-2012**

Called Mr. Humphrey to see how he is doing and spoke with his mother. **She said he is still doing well** and would let him know I called.

**3-29-2013**

Called Mr. Humphrey to see how he is doing. **Says he is doing great.** Admitted he had been off the Poly for awhile due to money but promised to get more soon.
