In May 14, 2010, **I was diagnosed with stage IV lung cancer** and started radiation oncology on May 22, 2010. I also had **six sessions of chemotherapy** with the last treatment on July 16, 2010.

After this session of chemo **I did not hear from my oncologist for about 2 1/2 months**. When I was finally contacted by the doctors they told me the **cancer had spread to the esophagus and the liver** and they felt **I was beyond hope**.

They **gave me a copy of my CT scan** and **sent me home**. The only thing that could help me was a miracle from God.

During the time I was ill and could not attend church I still mailed in my tithe. One day in July I sent a letter with my tithe **asking the church for prayers**. Pastor gave the letter to Pastor Saeed who gave it the people at **TEAM UP! Against Cancer**.

They came to see me, prayed with me, provided information on available resources and encouraged me to attend the Tuesday night Prayer Meeting at PFA. I started faithfully attending church, the TEAM UP meetings, the prayer meetings and sitting in the circle of prayer on Tuesday nights believing for my healing.

During that time I gave my CT scan to the people at TEAM UP, and they had a doctor read the scan. He confirmed it was '**stage IV lung cancer with metastasis to the liver, esophagus** ('I don't know how he can eat'), **the spine and most likely the brain**' – and added, 'He needs a miracle.'

I asked David Bryant what else could I try and **he researched and found a support product called Poly-MVA**. We contacted the people at Poly-MVA who referred us to **Dr. Charles Baughman, a doctor in Peoria, Arizona**, and **I started on the product on November 17, 2010**.

The approach was **IV infusion of Poly-MVA three times a week and 8 teaspoons of Poly-MVA liquid orally daily**. Dr. Baughman also suggested a specific dietary and supplemental program to go along with the Poly-MVA.

When I started on this approach my **CEA blood profile was 16.8** (normal is 4.3 to 5.0). I had faith and God started His work on me; my **CEA profile level has come down to 5.7** with our goal being 5.0.

On **May 8, 2011**, the doctors did a pulmonary procedure on my lungs and took some scar tissue from the lung and ran several tests and **they all came back 'Negative.'**

I had tests in **September of 2011** which proved **my liver, esophagus, spine and brain are cancer free** and **there is no presence of cancer anywhere else in my body**.

It has been 6 months since my last tests and **I am still cancer free**. I give praise and thanks to my God and my Lord and Savior Jesus Christ for my miracle for my healing!"

Spoke to John and he told me that his doctor had **taken him off Poly-MVA** and put him on Vitamin C IV because his **CEA marker went from 5.7 up to 5.9**. I told John that **CEA markers are not just "cancer markers"** and these **numbers can fluctuate** due to **other ailments or even an infection**. John said he was JUST DOING WHAT THE DOCTOR TOLD HIM. I told him we would get back to him.

1-15-2013

Received an update on John from **David Bryant** with "**TEAM UP! Against Cancer**". John is **doing awesome** and his **latest blood work shows he is clean and clear**. He is very active and walks at least an hour a day and looks great.
