I was diagnosed with **lung cancer in Oct 2004**. **Upper partial left lobe** was **surgically removed early Nov 2004**. One of our physicians, Dr. Robert D. Milne, **strongly recommended that I start using Poly-MVA**, which I did. I took a daily dose of of 2 tsp, 3 times a day.

I also underwent a **12-dose regimen of chemo**. While the dosage has been reduced, **I continue the usage of Poly-MVA and remain cancer free**.

In addition, **my brother-in-law** was diagnosed with **liver and bladder cancer in Jan 2010**.

We forwarded a supply of Poly-MVA, which he takes in addition to a very rigorous chemo regimen. **He reported to us 2 weeks ago** that his doctors had told him that **no sign of the tumor were evident on his latest scan**.

Go Poly-MVA!"

**1-17-2012**

Spoke to Stephen's wife and was told that **Stephen is in ICU**. He became ill and septic. She said **it was not from the lung cancer** but that he was improving day by day and that he may come home within a week. She did say that they were going to **have to check with kidney doctors** before **he can get back on Poly**.

**5-30-2013**

Spoke to Stephen and he said that he is not using Poly MVA at this time. He said he wants to keep his options open but **does recommend Poly MVA** to others.

**11-14-2014**

Talked to Stephen. Says he is doing very well and thanked me for calling.
