I was **diagnosed with Prostate Cancer in 2008** and was told about Poly MVA by my daughter in law. In December of 2008, **I ordered the product and started taking 4 tsp daily**. I have been [taking Poly MVA religiously for the past 10 years](#).

In November of 2008, my PSA had risen to 8.27 before I had started taking Poly. Over the years, it has steadily gone down and now **it is averaging around 6.0 some ten years after starting on Poly**.

Poly MVA has not only kept my PSA in check but it has given me an **improved quality of life** as well as [improved my Blood, Kidney and Liver test results](#).

Whenever I hear of someone who has been recently diagnosed with Cancer, **I tell them about Poly MVA** and what it has done for me.

I want to thank the **AMARC staff for being so great**, which specifically includes Toni and now Vivien. At age 83, I am still alive and well!

Ed

7-1-2010

Spoke to Edwin and he told me he feels great. **He told me he never took chemo or radiation** so he should be a good testimonial for the PolyMVA. I told him he already is a great testimonial.

5-16-2013

Spoke to Edwin, **he is doing very well.** Has no questions but said he was happy I called.

11-13-2015

Spoke to Mr. Stuart and he let me know that his wife had blood in her stool and her doctors believes it may be Colon cancer. He will have report next week and will call to let us know.

5-2-2019

When I spoke to Ed, **he said he has been taking Poly MVA for 10 years** and has **not used any other treatment to stop his prostate cancer.** He said he has other friends using Poly MVA that he has referred to the product. Most of his friends are people who use poly for prevention.

3-13-2020

Spoke to Ed and he has recently had a hernia operation. **He is very proud that he has only used PMVA for the past 10 years and kept his PSA stable. His PSA has not changed.** He shared the details of his appointment with his urologist and everything is the same. He is a **10 year Prostate Cancer survivor.**
